

C 语言课程设计 教学信息管理系统 大学编程作业 (TUST 天津科技大学 2021 年)

- C 语言课程设计 教学信息管理系统 大学编程作业 (TUST 天津科技大学 2021 年)
 - 一、项目简介
 - 二、项目要求
 - 三、项目源码
 - 四、交流学习

一、项目简介

本教学信息管理系统，我使用了链表数据结构来制作，实现了简单的增删查改逻辑，实现了文件的存储，并且终端界面较为美观易用。通过这次 C 语言课程设计的实践，我巩固了数据结构的知识，熟练应用了 C 语言指针。

这个项目是我大二写的，现在回顾已经非常粗糙，分享出来一方面希望可以帮助初学者，另一方面希望能让同学们可以从目前大学中普遍毫无价值的形式主义作业中解脱出来，更加高效地学习优质计算机知识和主流编程技术，一起发扬开源精神，感受互联网技术的美好愿景。

二、项目要求

某一教学信息管理系统，有如下基础信息：

1. 教师信息 (teacher.dat) 包括教师号 (大于 1 的正整数)、姓名、性别、学历、年龄、电话等 (教师号不能重复)；
2. 课程信息 (course.dat) 包括课程号 (大于 1 的正整数)、课程名称；
3. 教师与课程关联信息 (tc.dat) 包括教师与课程关联信息序号 (简称：教课号，大于 1 的正整数)、开课时间 (如 2021 年上半年的课程，开课时间为 202101，下半年开课的时间为 202102)、教师号、课程号；
4. 学生信息 (student.dat) 包括学号 (大于 1 的正整数)、姓名；
5. 学生与课程关联信息 (sc.dat) 其信息包括学生与课程关联信息序号 (简称：学课号，大于 1 的正整数)、学号、教课号；

必做要求：

1. 实现教师信息、课程信息、教师与课程关联信息、学生信息、学生与课程关联信息的录入；
2. 实现教师信息（教师号、姓名、性别、学历、年龄、电话）、课程信息（课程号、课程名称）、教师与课程关联信息（教课号、开课时间、教师号、教师名称、课程号、课程名称）、学生信息（学号、姓名）、学生与开课课程关联信息（学号、姓名、教课号、课程名称、开课时间）浏览；
3. 可实现对教师、学生与开课课程关联信息的任意查询；

选做要求：

1. 可实现对涉及的除教师号、课程号、教课号、学号、学课号外其它信息进行修改；
2. 可实现对信息进行逻辑删除（也就是对信息进行作废标记，物理上不删除）；
3. 假设老师每上一门课的基础课时量为 2，选课人数每超过 3 人（如：选课人数 ≤ 3 时，记课时量为 2； $3 < \text{选课人数} \leq 6$ 时，记课时量为 3；以此类推），则课时量加 1，根据教师号、开课时间统计并显示指定教师某学期的课时量。
4. List item

课设打分要求：

1. 须提交一个可通过编译的满足要求的 C 语言程序源文件；
2. 要有运行情况截图；
3. 如果完成必做要求的，得 80 分，否则酌情扣分；
4. 程序格式优雅，有适当得缩进、空行，标识符命名规范何理得，可酌情加分，最高 20 分。
5. 程序代码无法通过编译的，可根据错误现象酌情扣分。
6. 程序有严重问题，不具备基本输入、输出，或未完成核心算法的，最高得 50 分。

三、项目源码

程序设计思路：

1. 界面打印
2. 数据结构的设计，抽象出教学信息
3. 链表函数的设计，实现增删
4. 查改
5. 功能交互
6. 文件读写

```
/*
```

教学信息管理系统_C语言课程设计

一、某一教学信息管理系统，有如下基础信息：

- 1、教师信息 (teacher.dat) 包括教师号 (大于1的正整数)、姓名、性别、学历、年龄、电话等 (教师号不能重复)；
- 2、课程信息 (course.dat) 包括课程号 (大于1的正整数)、课程名称；
- 3、教师与课程关联信息 (tc.dat) 包括教师与课程关联信息序号 (简称：教课号，大于1的正整数)、开课时间 (如2021年上半年的课程，开课时间为202101，下半年开课的时间为202102)、教师号、课程号；
- 4、学生信息 (student.dat) 包括学号 (大于1的正整数)、姓名；
- 5、学生与课程关联信息 (sc.dat) 其信息包括学生与课程关联信息序号 (简称：学课号，大于1的正整数)、学号、课程号；

二、必做要求：

- 1、实现教师信息、课程信息、教师与课程关联信息、学生信息、学生与课程关联信息的录入； (30分)
- 2、实现教师信息 (教师号、姓名、性别、学历、年龄、电话)、课程信息 (课程号、课程名称)、教师与课程关联信息 (教课号、开课时间、教师号、教师名称、课程号、课程名称)、学生信息 (学号、姓名)、学生与课程关联信息 (学号、姓名、教课号、课程名称、开课时间) 浏览； (20分)
- 3、可实现对 (1) 中教师、学生与课程关联信息的任意查询； (30分)

三、选做要求 (三选一)：

- 1、可实现对 二.1 中涉及的除教师号、课程号、教课号、学号、学课号外其它信息进行修改； (20分)
- 2、可实现对 二.1中的信息进行逻辑删除 (也就是对信息进行作废标记，物理上不删除)； (20分)
- 3、假设老师每上一门课的基础课时量为2，选课人数每超过3人 (如：选课人数 ≤ 3 时，记课时量为2； $3 < \text{选课人数}$ 时，记课时量为3；以此类推)，则课时量加1，根据教师号、开课时间统计并显示指定教师某学期的课时量。 (20分)

四、课设打分要求：

- 1、须提交一个可通过编译的满足一、二要求的C语言程序源文件；
- 2、要有运行情况截图；
- 3、如果完成1、2要求的，得80分，否则根据一、二标注分值酌情扣分；
- 4、程序格式优雅，有适当得缩进、空行，标识符命名规范何理得，可酌情加分，最高20分。
- 5、程序代码无法通过编译的，可根据错误现象酌情扣分。
- 6、程序有严重问题，不具备基本输入、输出，或未完成核心算法的，最高得50分。

```
*/
```

```
/*
```

程序设计思路

- 1.界面打印
- 2.数据结构的设计，抽象出教学信息
- 3.链表函数的设计，实现增删查改
- 4.功能交互
- 5.文件读写

```
*/
```

```
#define _CRT_SECURE_NO_WARNINGS
```

```

#include <stdio.h>
#include <string.h>
#include <stdlib.h>           //防止闪屏: system("pause");

/*1.界面打印*/
/*主菜单函数*/
